

AP Gigabit PoE Switch

AI Overview

AP Gigabit PoE switches provide both power and data over Ethernet to access points and other devices, supporting seamless network deployment with high-speed connectivity. Key Features to Consider

Port Configuration and PoE Support

UGREEN 6-Port Gigabit PoE Switch: 4 PoE+ ports and 2 standard Gigabit ports, total PoE power 60W, supports IEEE 802.3af/at, VLAN isolation, and up to 250m transmission in extend mode, ideal for IP cameras and APs.

Reidubo 18-Port Gigabit PoE Switch: 16 PoE+ ports plus 2 Gigabit uplinks, total PoE power 250W, each port up to 30W, unmanaged plug-and-play, suitable for high-density AP deployments.

WAVLINK 5-Port Gigabit PoE Switch: 4 LAN + 1 WAN, supports IEEE 802.3af/at, centralized AP management, seamless roaming, and can manage up to 30 APs and 128 client devices.

Management and VLAN

Some switches, like UGREEN, offer VLAN support to isolate PoE ports for security and network optimization. WAVLINK switches provide centralized management for multiple APs, enabling easy configuration and guest network setup.

Installation and Build

Most switches support desktop or wall mounting. Robust metal housings ensure durability and heat dissipation, while built-in power supplies simplify installation.

Use Cases

Ideal for small to medium offices, schools, home networks, and security systems. Can power APs, IP cameras, VoIP phones, and other PoE-enabled devices without separate power adapters.

Performance

All listed switches provide full Gigabit speeds on all ports, ensuring high-bandwidth connectivity for APs and other network devices. Intelligent PoE detection prevents non-PoE devices from being damaged and optimizes power distribution.

Summary

When selecting an AP Gigabit PoE switch, consider port count, total PoE power, VLAN or management features, and installation flexibility. For small setups, a 4-6 port switch like UGREEN or WAVLINK is sufficient, while larger deployments benefit from high-capacity switches like Reidubo. All options support IEEE 802.3af/a...
