

Armored fiber optic patch cord for sale price

AI Overview

Armored fiber optic patch cords typically range from \$10 to \$100+ per unit, depending on fiber type, length, connectors, and armoring specifications.

Pricing Overview

The cost of armored fiber optic patch cords varies widely based on several factors:

- Fiber Type:** Singlemode (OS2) and multimode (OM3/OM4/OM5) fibers have different price points, with high-speed or specialized fibers like OM5 generally costing more.
- Connector Type:** LC, SC, ST, FC, and APC variants influence pricing, as precision connectors like MPO/MPT or APC require more manufacturing accuracy.
- Length:** Prices increase linearly with cable length, with longer cables costing more due to additional materials and labor.
- Armoring Material:** Aluminum or steel armored jackets add durability and rodent resistance, which increases cost compared to standard patch cords.
- Environmental Features:** LSZH jackets, waterproofing, and temperature-resistant designs for indoor/outdoor use can further affect pricing.

Typical Price Ranges

- Short, standard armored patch cords (1–5 meters):** Approximately \$10–\$30 per unit for common multimode fibers with LC or SC connectors.
- Medium-length cords (10–50 meters):** Around \$30–\$70, depending on fiber type, connector, and armoring.
- Long or specialized cables (50+ meters, tactical or military-grade):** Can exceed \$100 per unit, especially for singlemode, high-speed, or ruggedized tactical cables.

Market Considerations

The global demand for armored fiber patch cords is growing due to 5G network expansion, hyperscale data centers, industrial automation, and IoT deployments, which can influence pricing trends. Custom assemblies and bulk orders may offer cost savings, but prices are highly dependent on supplier and technical specifications.

Summary

Armored fiber optic patch cords provide enhanced durability, rodent resistance, and environmental protection.
