

Cost of Galvanized Cable Trays in Benin

AI Overview

Galvanized cable trays in Benin typically cost between \$10 and \$30 per meter, depending on material, type, and supplier. Price Range and Factors The cost of galvanized cable trays varies based on material, tray type, size, and surface finish. Standard hot-dip galvanized steel ladder trays, commonly used in industrial and commercial projects, generally fall within \$10–\$30 per meter. Aluminum trays are more expensive, ranging from \$20–\$50 per meter, while custom or coated trays may cost more due to additional processing or corrosion protection. Bulk orders often reduce the per-meter cost, and local suppliers may offer competitive pricing for nationwide delivery. Local Suppliers in Benin Several suppliers provide galvanized cable trays across Benin, including Ned-Tech, which serves cities like Cotonou, Porto-Novo, Parakou, Abomey-Calavi, and Bohicon. They offer a range of products such as ladder trays, perforated trays, trunking systems, and wire mesh trays, all made from galvanized steel, stainless steel, or aluminum. Other B2B marketplaces list multiple suppliers where you can request quotes directly for bulk or project-specific orders. Additional Considerations Tray Type: Ladder trays are more expensive but support heavier cables, while perforated or wire mesh trays are cheaper and suitable for lighter loads. Length and Fittings: Standard tray lengths are usually 2.4 meters, and fittings are priced per piece. Environmental Factors: Coastal humidity or inland heat may influence the choice of coating and material, affecting cost. Shipping and Installation: Transport and labor costs can add to the total project expense, especially for heavier steel trays. For accurate budgeting, it is recommended to contact local suppliers directly to obtain quotes based on your project's specifications, quantity, and delivery location. This ensures you account for all variables, including bulk discounts and local logistics.
