

How much does a 400-meter fiber optic cable cost

AI Overview

The cost of 400 meters of fibre optic cable ranges from approximately \$160 to \$1,200 USD, depending on type, quality, and specifications. Estimated Pricing by Fibre Type

OM3 Multimode Fibre: Typically \$0.60–\$1.20 AUD per metre, so 400 meters would cost \$240–\$480 AUD. OM3 is suitable for short-range data centre links but may require earlier replacement for higher-speed upgrades.

OM4 Multimode Fibre: Slightly higher at \$0.70–\$1.50 AUD per metre, totaling \$280–\$600 AUD for 400 meters. OM4 supports higher bandwidth and longer distances, making it more future-proof.

Singlemode Fibre (OS2): Costs range from \$0.40–\$1.00 AUD per metre, giving \$160–\$400 AUD for 400 meters. Singlemode is ideal for long-distance or high-performance networks, though associated transceivers are more expensive.

Factors Affecting Cost

- Cable Construction:** Indoor-rated, outdoor-rated, or armored cables can increase the price. Armored or direct-burial cables may cost \$0.50–\$5 per foot, significantly affecting total cost.
- Pre-Terminated vs Field Termination:** Pre-terminated cables with connectors (LC, SC, MPO) are more expensive but reduce installation time and signal loss.
- Fibre Count:** Higher strand counts increase cost proportionally. For example, a 12-strand cable costs less than a 24-strand cable.
- Bulk Purchase Discounts:** Buying in bulk often reduces the per-metre cost, especially for commercial or enterprise deployments.

Summary

For 400 meters, expect a rough cost range:

- Singlemode: \$160–\$400 AUD
- OM3 Multimode: \$240–\$480 AUD
- OM4 Multimode: \$280–\$600 AUD

Additional costs may apply for installation, connectors, or specialized environmental ratings. Choosing the right fibre type depends on your network speed, distance, and future upgrade plans.
