

How much does a double-layer cable tray cost in Brazil

AI Overview

Double-layer cable trays in Brazil typically cost between \$20 and \$50 per meter, depending on material, coating, and supplier. Price Range and Factors The cost of cable trays in Brazil varies widely based on material, type, and surface finish. Steel trays, including hot-dip galvanized or powder-coated options, are common and generally range from \$10 to \$30 per meter, while aluminum trays, which are lighter and corrosion-resistant, can cost \$20 to \$50 per meter. Double-layer or ladder-type trays, which support heavier cable loads, are usually at the higher end of this range due to their structural design and durability requirements. Other factors influencing price include:

- Coating and corrosion resistance: Hot-dip galvanized (HDG) trays are more expensive but last longer outdoors, while pre-galvanized trays are cheaper but less durable.
- Supplier and customization: Local manufacturers in Brazil, such as Brilltech Engineers and Jeetmull Jaichandlall, offer custom solutions, which can increase costs depending on specifications.
- Order quantity and shipping: Bulk orders can reduce per-meter costs, but transporting heavy trays across Brazil can add significant freight charges.
- Installation and labor: Skilled labor and installation complexity can add to the total project cost, especially for double-layer systems.

Market Context The Brazilian cable tray market is influenced by industrial investment, construction projects, and import reliance. Domestic manufacturers provide competitive pricing for standard trays, while high-specification or large-scale projects may involve imported trays, which can increase costs due to tariffs and shipping. Raw material prices, particularly steel and aluminum, also affect final pricing.

Practical Advice For budgeting, expect \$20–\$50 per meter for double-layer trays, with steel options on the lower end and aluminum or coated trays on the higher end. Request...
