

How much does a standard 4-core optical fiber cable cost

AI Overview

4-core optical fiber cables typically range from \$0.03 to \$1.80 per meter, depending on type, jacket, and application.

Price Overview

- Basic indoor 4-core cables:** Around \$0.40 per meter for standard single-mode or multimode cables with PVC jackets, suitable for short-distance indoor distribution.
- Ruggedized outdoor or armored cables:** Up to \$1.80 per meter, designed for harsh environments with enhanced durability and protection.
- Single-mode OS2 cables:** Typically \$60–\$90 per 100-meter reel, with tight-buffered construction and PVC jacket; prices may vary with order volume and customization.
- Multimode OM3/OM4 cables:** Generally lower cost than single-mode, optimized for shorter distances within buildings or campuses.
- Wholesale or bulk pricing:** Large orders (e.g., over 1,000 meters) often receive tiered discounts, reducing per-meter cost by 20–40%.
- Low-cost options:** Some suppliers, like Alibaba, list prices starting from \$0.03 per meter for bulk orders, though quality and compliance should be verified.

Factors Affecting Price

- Cable Type:** Single-mode cables support long-distance transmission and are more expensive than multimode cables designed for shorter runs.
- Jacket Material:** PVC, LSZH, or armored jackets influence cost; armored or outdoor-rated cables are pricier due to enhanced protection.
- Length:** Longer cables cost more due to material usage, but bulk reels offer better cost efficiency.
- Manufacturer and Brand:** Reputable brands like OWIRE provide consistent quality, testing, and warranty coverage, which can justify higher prices.
- Customization:** Options like color-coded jackets, hybrid fiber-copper configurations, or specific lengths may slightly increase unit cost but improve system organization and maintenance.

Practical Considerations

- Ensure the cable meets international standards (ISO/IEC 11801, TIA/EIA-568) for signal integrity and durability.
- Verify fiber...
