

# How much does a wire mesh cable tray cost

## AI Overview

Wire mesh cable trays typically cost between \$2 and \$25 per meter, depending on material, size, and finish. Wire mesh cable trays, also known as basket trays, are among the most affordable cable tray options due to their lightweight construction and ease of installation. The price per meter varies based on several factors:

- Material:** Galvanized steel is common and balances durability with cost. Stainless steel offers high corrosion resistance but is more expensive. Aluminum is lightweight and rust-proof, generally costing more than steel. Plastic trays are budget-friendly but not suitable for heavy loads.
- Tray Type and Coating:** Wire mesh trays are cheaper than ladder trays and ideal for lightweight cabling. Coatings like hot-dip galvanization (HDG) or powder coating increase durability and price, while pre-galvanized steel is less expensive but less durable in corrosive environments.
- Size and Dimensions:** Larger trays or deeper sections may cost more per meter. Standard wire mesh trays are easy to cut and bend, which can reduce labor costs during installation.
- Installation and Project Factors:** Labor, supports, connectors, and brackets add to the total cost. Bulk orders or large-scale projects can reduce the per-meter price significantly.

**Typical Price Range:** Wire mesh trays: \$2–\$25 per meter depending on material and finish. Steel trays: \$5–\$25 per meter. Aluminum trays: \$6–\$30 per meter. Stainless steel trays: \$20–\$100 per meter for high-demand environments.

In summary, for lightweight cabling in offices or data centers, wire mesh cable trays are cost-effective, with prices starting as low as \$2 per meter for pre-galvanized steel and increasing with material quality, coating, and size. For precise budgeting, consider the material, environmental conditions, and installation requirements.
