

How much is a 60cm fiber optic cable

AI Overview

A 60 cm (0.6 meter) fiber optic cable typically costs between \$0.05 and \$3, depending on type, construction, and quality.

Pricing Breakdown

Single-mode fiber (OS2): Retail prices range from approximately \$0.09 to \$1.52 per foot (\$0.30 to \$5 per meter), so a 60 cm cable would cost roughly \$0.18 to \$3.

Multimode fiber (OM3/OM4): Retail prices are higher, around \$1.50 to \$6 per foot (\$4.92 to \$19.68 per meter), making a 60 cm cable cost approximately \$2.95 to \$11.80.

Armored or specialty cables: Adding steel armor or LSZH jackets increases cost by 20–50%, so a 60 cm armored cable could range from \$3 to \$15 depending on specifications.

Factors Affecting Price

Fiber Count: Single-strand cables are cheaper, while multi-strand (12-core, 24-core, or higher) cables increase the price proportionally.

Cable Construction: Indoor PVC or LSZH jackets are cheaper than plenum-rated or outdoor UV-resistant jackets.

Pre-terminated vs. Bulk: Pre-terminated patch cables with connectors cost more than raw cable.

Brand and Quality: Premium glass fiber (e.g., Corning) costs more but offers lower attenuation and higher reliability.

Practical Note

For a short 60 cm cable, the cost is mostly influenced by whether it is pre-terminated and the fiber type. Bulk purchases or generic cables can be significantly cheaper, while high-performance or armored cables are at the higher end of the range. In summary, a 60 cm fiber optic cable can cost anywhere from \$0.18 for a basic single-mode cable to \$12–15 for a high-end multimode or armored cable.
