

How to set up automatic reel cutting for optical cable sheathing

Overview

Verify the cable part number and cutting length. Monitor respool tension to prevent causing cable damage. The processing line is designed for the production of high-quality cables with optical fibers, for example, for medical technology, automotive, or telecommunications. High-precision welding connections with low light attenuation are made on the prepared fibers. With a single-operator setup, it significantly reduces manual labor fatigue, improves safety, and maximizes overall output. In addition to precise cutting to length, the Speedy 40 can also strip lengths over 10 mm without any. The smart automatic 3-in-1 function can realize the simultaneous completion for process of "Cable peeling - Kevlar shearing - Outer sheath splitting" at same by just one action. Its innovative design allows RECONFIGURATION FOR TWO SPOOL SIZE.

Cable Cutting System-Novo Precision

While most manufacturers who deal with cable are stuck manually measuring and cutting cable lengths, we have designed an automated system to cut cost and increase quality of cut and accuracy of lengths.

FBT-3000 Automatic Fiber Jacket Stripping Machine

After the optical cable is inserted into the guide hole, the built-in clamping jaw mechanism automatically clamps the optical cable to the set length, and then starts the stripping action to avoid the

Automatic Inline Reel Handling System | Cable Reel Packaging | Windak

The AutoLoader AL60 is designed for continuous inline reel packaging with extruder, ensuring efficient and automated cable reel handling. With a single-operator setup, it significantly reduces manual
