

Huawei Gigabit Switch with 16 Optical Ports

AI Overview

The Huawei S110-16LP2SR is a 16-port Gigabit switch with 2 SFP uplink ports, supporting PoE+ and high-speed optical connectivity. Overview The Huawei S110-16LP2SR is a versatile Gigabit switch designed for small to medium-sized businesses (SMBs) and larger organizations. It features 16 Gigabit Ethernet ports (10/100/1000 Mbps) for connecting devices such as computers, printers, and network storage, along with 2 SFP uplink ports that allow optical fiber connections for high-speed uplinks up to 10 Gbps, making it suitable for high-performance networking environments.

Key Features

- Port Configuration:** 16 Gigabit Ethernet ports for device connectivity and 2 SFP uplink ports for optical fiber connections.
- PoE Support:** Provides Power over Ethernet (PoE+) with a total budget of 124W, enabling devices like IP cameras, phones, and access points to receive power directly through the network cable.
- Management Options:** Available as an unmanaged or managed switch, supporting features like VLAN configuration, QoS, port security, and network monitoring in the managed version.
- Operating Modes:** Supports standard mode, port isolation, port bonding, and flow control disabling for flexible network management.
- Design:** Fanless design for quiet operation, metal rackmount chassis, and options for wall or desktop installation.
- Aesthetics:** Part of Huawei's eKitEngine S110 series, featuring a modern crystal-like design with Red Dot Design Award recognition.

Deployment Scenarios

The S110-16LP2SR is ideal for:

- Small to medium-sized businesses requiring reliable Gigabit connectivity.
- Enterprise access networks where PoE devices are deployed.
- High-bandwidth uplink requirements using SFP optical ports for connecting to core switches or data centers.
- Commercial stores, hotels, schools, and SOHO environments where quiet, fanless operation is preferred.
