

# Iraq Box-type Optical Cable Distribution Box

## Overview

The product is designed and manufactured according to the communication industry standard YD / T988 and has the functions of optical cable lead in, fixing and stripping protection, optical fiber splicing and protection, pigtail storage, jumper management, optical fiber fixed. The product is designed and manufactured according to the communication industry standard YD / T988 and has the functions of optical cable lead in, fixing and stripping protection, optical fiber splicing and protection, pigtail storage, jumper management, optical fiber fixed. Fiber distribution box is made of high-strength engineering plastics, anti-UV, anti-aging ability. The distribution box is sealed adopts buckle + two screw type structural seals, and the left and right turnover structure of the housing is opened. Over the period under review, consumption, however, posted a buoyant expansion. Over the period under review, the market reached the maximum level at \$X in. Fiber distribution box is suitable for the wiring connection of optical cable and optical communication equipment, through the adapter in the wiring box, the optical jumper leads the optical signal, and realizes the optical wiring function. OTRANS strives to provide you with professional, reliable. According to the definition of YD/T 988-2015, the fiber cabinet is an interface device used to connect the main fiber optic cable and the distribution fiber optic cable outdoors.
