

Most Complete List of Optical Cable Models and Prices

AI Overview

Fiber optic cables come in single-mode and multimode types, with prices ranging from \$0.05 to \$6 per foot depending on type, construction, and application.

Types of Fiber Optic Cables

- 1. Single-Mode Fiber (SMF)**
Core Diameter: 8–10 microns
Transmission Distance: Up to 40–100 km without amplification
Applications: Long-haul networks, campus backbones, metropolitan networks
Construction: OS1 (indoor, tight-buffered) and OS2 (outdoor, loose-tube)
Price Range: \$0.09–\$1.52 per foot depending on strand count and jacket type
- 2. Multimode Fiber (MMF)**
Core Diameter: 50 or 62.5 microns
Transmission Distance: Shorter distances due to higher signal attenuation
Applications: Data centers, enterprise LANs, short-reach connections
Standards: OM1, OM2, OM3, OM4
OM1: Up to 100 ft at 10 Gbps, most affordable
OM2: Up to 260 ft at 10 Gbps
OM3: Up to 1000 ft at 10 Gbps
OM4: Up to 1300 ft at 10 Gbps
Price Range: \$1.50–\$6 per foot for OM3/OM4, lower for OM1/OM2
- 3. Armored Fiber Cables**
Purpose: Protection in harsh environments or direct burial
Price Range: \$0.50–\$5 per foot depending on armor type and environmental rating
- 4. Indoor vs Outdoor Cables**
Indoor (PVC or LSZH jacket): Cheaper, suitable for climate-controlled environments
Outdoor (PE, UV-resistant jacket): Higher cost, designed for aerial or long-distance installations
Direct-buried or plenum-rated cables: Additional testing and certification increase cost
- 5. Aerial / Self-Supporting Cables**
Designed for overhead installations
Price Range: \$0.40–\$1.50 per meter depending on fiber count and construction

Factors Affecting Prices

- Fiber Count:** More strands increase cost (e.g., 12-strand ~\$0.50/ft, 24-strand ~\$1/ft)
- Cable Construction:** Loose tube, tight-buffered, armored, or non-armored
- Material:** Glass fiber cores are more expensive than plastic optical fiber
- Volume:** Bulk purchases (>10 km) can red...
