

Network cabinets are outdoors

Overview

Outdoor network cabinets are specialized enclosures designed to house and protect critical networking equipment—such as switches, routers, fiber termination panels, power supplies, and wireless access controllers—in external environments. At Sturdx, we provide outdoor cabinets that merge resilience, functionality, and reliability. Global Recycled Standard (GRS) certified products contain recycled content that has been independently verified at each stage of the supply chain, from the source to the final product and meet social. Secure your outdoor network equipment in weatherproof, lockable enclosures. These are manufactured from galvanized steel, aluminum or stainless steel material, making them the perfect layer of security.
