

Price of Aerial Optical Cable Equipment

AI Overview

Aerial optical cable costs range from \$2,900 to \$4,200 per mile for standard G.652.D fiber, with installation averaging \$8–12 per linear foot. Pricing Overview The cost of aerial fiber optic cable depends on several factors including fiber type, core count, cable design, and installation requirements. Standard G.652.D cables typically cost \$2,900 per mile for bulk orders (10+ miles) and up to \$4,200 per mile for single-mile purchases. Higher core counts, such as 144-core cables, can command up to 60% higher prices compared to 48-core equivalents due to increased material and manufacturing complexity. Installation Costs Aerial installation includes the cable, suspension hardware, and labor. On average, installation costs range from \$8 to \$12 per linear foot, which translates to \$42,240–\$63,360 per mile. Costs can vary depending on span length, terrain, and whether the cable is self-supporting (ADSS) or catenary. Cable Types and Considerations ADSS (All-Dielectric Self-Supporting): Contains integral strength members, suitable for long spans (>100m), and does not require a separate messenger wire. Catenary (GYTC8S, figure-8, or lashed cables): Uses an external steel messenger, optimized for dense urban grids, and generally more cost-effective for shorter spans. Fiber Core Count: Higher core counts increase cost; for example, 144-core cables are significantly more expensive than 48-core cables. Market Trends The aerial fiber market is growing due to 5G backhaul, rural broadband expansion, and urban connectivity upgrades. Innovations like UV-resistant sheathing, hydrophobic gels, and drone-assisted installation are helping reduce deployment costs and improve durability. Regional pricing may vary, with bulk orders and long-term contracts offering the best value. In summary, when budgeting for aerial optical cable, consider both material costs per mile and installation expenses, along with cable type and fiber count, to estimate total project costs accurately.
