

# Price of Fireproof Straight-through Cable Trays

## AI Overview

The price of fireproof straight-through cable trays varies widely depending on material, size, and order quantity, typically ranging from \$20 to \$150 per meter for standard stainless steel or FRP trays.

**Pricing Overview**

**Stainless Steel Cable Trays:** High corrosion resistance and fireproof properties make stainless steel trays more expensive. Prices generally range from \$50 to \$150 per meter, depending on thickness (0.5–3 mm), width (50–1200 mm), and length (2–6 meters) offered by suppliers like Jiangsu Holdee Electric Co., Ltd and Tongzhou Machinery.

**FRP (Fiberglass Reinforced Plastic) Cable Trays:** FRP trays are fireproof, corrosion-resistant, and lightweight. They are often slightly less expensive than stainless steel, with prices typically starting around \$20–\$80 per meter, depending on resin type, load capacity, and fire rating.

**Galvanized Steel Trays:** Hot-dip galvanized straight-through trays offer moderate fire resistance and corrosion protection, with prices generally between \$30 and \$100 per meter, influenced by tray dimensions and coating thickness.

**Factors Affecting Price**

**Material Type:** Stainless steel and FRP are more expensive than standard carbon steel due to fireproofing and corrosion resistance.

**Tray Dimensions:** Wider and thicker trays with higher load capacity cost more.

**Fire Rating and Certification:** Trays tested to standards like DIN 4102-12, ASTM E84, or NFPA may carry a premium.

**Order Quantity:** Bulk orders reduce per-meter cost; small orders may incur additional shipping or customs fees.

**Supplier Location and Delivery:** Shipping from China or Europe affects total cost, including lead time (typically 7–30 days depending on stock and production).

**Procurement Tips**

Request pre-production samples to verify quality and fireproof performance. Confirm load capacity and span length to ensure compliance with project requirements. Consider...
