

Price of a three-level electrical distribution box used on a construction site

AI Overview

A standard three-level electrical distribution box for construction sites typically costs between \$250 and \$600, depending on specifications, materials, and included protective devices.

Overview Three-level distribution boxes are designed for temporary power supply on construction sites, providing electricity to tools, small machinery, and lighting. They are commonly made from cold-rolled steel or reinforced materials with rainproof designs, sloping roofs, and sturdy brackets for outdoor durability. These boxes often include circuit breakers (e.g., 2P/32A, 3P/63A, 3P/100A) and can accommodate both three-phase and single-phase power.

Price Factors

- Material and Build Quality:** Steel cabinets with waterproof coatings or reinforced brackets are more expensive than basic enclosures.
- Amperage and Circuit Capacity:** Boxes with higher-rated main switches or more outgoing circuits cost more.
- Additional Features:** Integrated sockets, energy meters, and modular layouts increase the price.
- Brand and Certification:** Established manufacturers with quality assurance and compliance with safety standards may charge a premium.
- Quantity and Customization:** Bulk orders or OEM customization can affect pricing, sometimes offering discounts.

Typical Price Range

- Entry-level models:** Around \$250–\$350, suitable for small tools and temporary lighting.
- Mid-range models:** Around \$350–\$500, with multiple circuit breakers, better waterproofing, and higher amperage capacity.
- High-end or customized models:** Up to \$600 or more, including advanced safety features, modular layouts, and industrial-grade sockets.

Applications These boxes are ideal for: Powering handheld tools like drills, grinders, and concrete vibrators. Supplying small construct...
