

Price of outdoor cable trays in walls

AI Overview

Outdoor wall cable trays typically range from \$20 to \$150 per meter, depending on material, size, and load capacity. Factors Affecting Price

Material: Outdoor cable trays are commonly made from hot-dip galvanized steel, stainless steel, or high-quality insulating materials. Hot-dip galvanized trays are more corrosion-resistant and suitable for harsh weather, which increases cost compared to pre-galvanized or plastic trays.

Tray Type and Design: Options include solid wall, perforated, or ladder-style trays. Solid or reinforced trays provide better protection against debris and physical damage, while perforated trays allow ventilation and easier cable management. Ladder-style trays are ideal for heavy power cables.

Load Capacity and Duty Rating: Trays are classified as light, medium, or heavy-duty. Heavy-duty trays designed for industrial applications or high cable loads are more expensive due to thicker gauge steel and reinforced construction.

Length and Width: Standard lengths are 1-meter or 3-meter sections, with widths ranging from 50mm to 600mm. Larger widths and longer sections increase the price.

Accessories and Installation: Couplers, bends, risers, and cover strips are additional costs. Outdoor trays often require UV-resistant coatings or insulated finishes for safety and longevity.

Typical Price Ranges

- Light-duty outdoor trays: \$20–\$40 per meter
- Medium-duty trays: \$40–\$80 per meter
- Heavy-duty or reinforced trays: \$80–\$150 per meter

These prices can vary depending on supplier, region, and bulk purchase discounts. For example, suppliers like NewReach emphasize durability, weather resistance, and ease of installation, which may slightly increase upfront costs but reduce long-term maintenance expenses.

Recommendations

- Choose hot-dip galvanized or stainless steel for outdoor installations to prevent corrosion.
- Select the appropriate duty rating based on cable weight and environmental exposure.
- Consider accessories and installation requirements when budgeting, as these can add 10–20% to the total cost.
