

Procurement of Fire-Resistant Cable Trays in Canada

AI Overview

Fire-resistant cable trays in Canada can be sourced from leading manufacturers like Unitray, Superior Tray, MP Husky, and T&B/ABB, offering CSA-compliant steel, aluminum, and fiberglass systems with fire protection options.

Key Canadian Suppliers

- Unitray:** Offers CSA-approved Class C, D, and E aluminum cable trays with standard lengths of 3m, 5m, and 6m, and custom lengths available. Their FASTRAY® products are ready-to-install, and they provide rapid delivery (3–5 days for standard orders) and support for custom fabrication.
- Superior Tray:** Provides steel and aluminum ladder, solid bottom, and perforated trays suitable for industrial, commercial, and telecommunications projects. They focus on durability, flexibility, and compliance with safety standards.
- MP Husky:** Supplies fiberglass, steel, and aluminum cable trays that meet or exceed CSA, NEMA, UL, and CTI standards, ensuring compliance with Canadian regulations.
- T&B Cable Tray (ABB Electrification Canada):** Offers ladder, large radius, long span, nonmetallic, one-piece, and wire basket trays. Customization options include non-standard lengths, special colors, pre-drilled grounding holes, and custom rung spacing.

Fire-Resistant Solutions

For enhanced fire protection, consider coatings and tapes designed to prevent flame propagation and maintain cable functionality during fire events:

- FLAMMOTECT-A:** A fire protection coating that forms a protective shield around cables and trays, suitable for high-rise buildings, industrial facilities, hospitals, and power stations.
- DG-CR 0.7 Fire Protection Tape:** Provides a robust barrier against fire, UV radiation, moisture, and chemicals, ensuring reliable operation of critical cable systems.

These solutions are compatible with both indoor and outdoor installations and are designed to meet stringent safety standards.

Considerations for Procurement
